IN ADDITION	
The FIZZ	<p>Bessel A. van der Kolk, (2015) <i>The Body Keeps the Score: Brain, Mind, and Body in the Healing of Trauma</i> "BEFRIENDING THE BODY"</p>
If you always do what you've always done, you will always get what you've always got	<p>Many people attribute this quote to Anthony Robbins and before him Albert Einstein, Henry Ford, and even Mark Twain. Regardless of the origin, what matters is the point it makes that resonates with The Decider.</p> <p>Daniel J. Siegel (2012) <i>Pocket Guide to Interpersonal Neurobiology: An Integrative Handbook of the Mind</i> "if we use how we were taught yesterday to teach our children today, we are not preparing them well for tomorrow."</p>
Neuroplasticity	<p>Daniel J. Siegel (2015) <i>No-Drama Discipline: The Whole-Brain Way to Calm the Chaos and Nurture Your Child's Developing Mind</i> "As scientists put it, the brain is plastic, or moldable. Yes, the actual physical architecture of the brain changes based on what happens to us."</p>

THE DECIDER LIFE SKILLS - Evidence

	Michael Merzenich Professor Emeritus Neuroscientist at the University of California, San Francisco. "Your brain - every brain - is a work in progress. It is 'plastic.' From the day we're born to the day we die, it continuously revises and remodels, improving or slowly declining, as a function of how we use it"
Impulsivity	Gabor Maté (2008/2011) In the Realm of Hungry Ghosts: Close Encounters with Addiction "Whenever a person "overreacts"—that is, reacts in a way that seems inappropriately exaggerated to the situation at hand—we can be sure that implicit memory is at work."

© The Decider & The Decider Life Skills have been co-created by Michelle Ayres and Carol Vivyan. CBT and DBT informed skills based on the work of: Beck, Ellis, Linehan, Padesky and Young, in addition to the evidence base for the individual skills listed.
